

From a PC equipped with Windows 7 (and lower) Operating System

- 1. Install LogTRAK 1.4.0.0 (or higher) as an administrator
- 2. Plug in a Bluegiga BLED112 USB adapter to your PC

(More information about the **Bluegiga BLED112** USB adapter can be found at <u>http://www.silabs.com/products/wireless/Bluetooth®/Bluetooth®-smart-modules/Pages/bled112-Bluetooth®-smart-dongle.aspx</u>

Note:

Windows 7 (and lower) cannot access Bluetooth[®] Low Energy devices, therefore a generic Bluetooth[®] 4.0 (or higher) USB adapter will not be able to create the connection between your PC and your dive computer.

Use a **Bluegiga BLED112** USB adapter to connect your dive computer to your PC via LogTRAK.

0.	All Dives		ок	Cancel	

5. On tab "Download", please select "Bluetooth® Low Energy" and click the "OK" button **Note:**

Unless you modify it, this setup will stay and you don't need to repeat steps "4" and "5" the next time you use LogTRAK.

- 6. Switch on your dive computer
- 7. Go to the Bluetooth[®] menu of your dive computer and activate Bluetooth[®] pairing mode (Please refer to your dive computer user's manual for more details on how to activate Bluetooth[®] pairing mode)
- 8. On LogTRAK, use menu "Dive", "Download dives" or click on the icon
- 9. Select your dive computer and click on the "Connect" button (or double click on your dive computer from the devices list)

Bluetoo	th	
	Discover Connect	
Devices	5	
Aladin [0:13:43:d:5:e4]	
//./COM9		_
n		

Enter the 6 digit pin code shown on your dive computer display and click on the "Ready" button (or press "Enter" on your keyboard)

Í	Pairing De	vice		22
