Voluntary Recall

SCUBAPRO is conducting a voluntary recall of the Air 2 Converter Kit. The converter is a plastic cylinder that permits an Air 2 Alternate Inflation Regulator to be attached to a non-SCUBAPRO buoyancy compensator.

The Air 2 Converter Kits were sold beginning October 8, 2003. They were also included in the box of the Air 2 Alternate Inflation Regulator beginning December 19, 2003. A break in the converter coupling could occur which will impact the diver's ability to control buoyancy.

For safety reasons, if you dive with an Air 2 Alternate Inflation Regulator on a non-SCUBAPRO buoyancy compensator we ask that you immediately stop use and bring your buoyancy compensator with the Air 2 intact to your Authorized SCUBAPRO Dealer for evaluation. **IF YOU ARE DIVING WITH A SCUBAPRO BUOYANCY COMPENSATOR, YOU ARE NOT AFFECTED BY THIS RECALL.**

Replacement Program

SCUBAPRO will replace your Air 2 Converter Kit with a new one within thirty (30) days or sooner. In order to obtain a replacement, register on line by filling out the form below. After we obtain your name, address, and telephone number, a SCUBAPRO representative will contact you with the Authorized SCUBAPRO Dealer near you. All you will need to do is contact this dealer to schedule your evaluation and new replacements if necessary.

To contact SCUBAPRO UWATEC, please send your email to recallinfo@scubapro.com and include the following information:

- Name
- Address
- Phone number where you can be reached
- Air 2 Serial Number
- Name of the retail store
